DETAILED ACTION

Response to Amendment

Claims 21-42, 44-89 are in the case.

Claims 1-20, 43 have been canceled.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 21-42, 44-89 are rejected under 35 U.S.C. 103(a) as being unpatentable over Czadzeck (5,572,979) in view of Pyotsia et al (4,691,894).

Czadzeck teaches an intake system for controlling air-flow into an internal combustion engine except for an air diffuser positioned downstream of the throttle valve. Pyotsia et al teach an air diffuser (9-12) extending into the main bore and being positioned downstream of the throttle valve 2 (see figures 6-7). Therefore it would have been obvious to one having ordinary skill in the art at the time the invention was made to employ the air diffuser on the intake system of Czadzeck as taught by Pyotsia et al in order to reduce noise in the intake system.

2. Claims 21-42, 44-89 are rejected under 35 U.S.C. 103(a) as being unpatentable over Czadzeck (5,572,979) in view of Lassiter (3,238,955).

Art Unit: 3747

Czadzeck teaches an intake system for controlling air-flow into an internal combustion engine except for an air diffuser positioned downstream of the throttle valve. Lassiter teaches an air diffuser (28-29) extending into the main bore and being positioned downstream of the throttle valve 14 (see figures 1-2). Therefore it would have been obvious to one having ordinary skill in the art at the time the invention was made to employ the air diffuser on the intake system of Czadzeck as taught by Lassiter in order to reduce noise in the intake system.

Response to Arguments

3. Applicant's arguments with respect to claims 21-42, 44-89 have been considered but are moot in view of the new ground(s) of rejection.
